

# CONCRETE GRINDERS

## DP-DX22-P

### COMPACT PROPANE FLOOR GRINDING MACHINE

Efficiency, durability, and precision are critical considerations in the concrete and terrazzo flooring industry when selecting equipment that can significantly impact the outcome and profitability of your project. DiamoPro Systems understands these demands and has developed the DX22-P 22 inch propane powered rotary concrete floor grinder to meet them.

Designed with the demands of the construction site in mind, the DX22-P is built to withstand rigorous use, providing consistent performance and durability. Its robust gearbox delivers the high torque necessary for effectively tackling even the most challenging surfaces, including concrete, terrazzo, and natural stone. The DX22-P is a reliable partner for superior prep, polish, and removal.

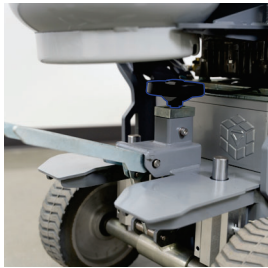

#### DESIGN FEATURES

- Heavy Duty Gearbox
- High Torque Design
- Counter Rotating Heads
- Compact Size

#### SPECIFICATIONS

ENGINE	17HP Kawasaki
FUEL	Propane
PRESSURE	430-510 LBS
WEIGHT	662 LBS
PLATES	2 X 12.375"
GRINDING	22" Width
SPEED	617 RPM
DIMENSIONS	35"x22"x52"
